

PRINCIPAL COUNCIL 1

TO THE EDITOR OF THE HERALD.
 Sir.—The writer of a letter signed "J. Liddell" in your issue of July 23rd, asserts that the establishing of a college for women in connection with the University "will be an unwarrantable waste of money." Arguments put forward in support of this assertion are the following:—1. That the University "provides for the whole of the instruction of the female sex."

the graduates every year consist of those who

their special needs than the general instruction of the masses. It is true that the colored people are in a position to be benefited by the distance, even if they cannot themselves afford to pay the expenses of residence in Italy, with its climate and culture, and the opportunity of a bursary, of which a considerable number will be able to avail themselves. The plan of giving poor students access to the higher education of the country is a noble one, which the country can provide. If our countrymen will not be so generous as to contribute to the purpose, and sufficient in amount to provide a place of residence for women students of poor parents, it is not our business to make the charge who shall be "intelligent" in the sequel—that is, one who has a thorough understanding of the conditions of the colored people, and of education, and who possesses the qualities more so respected, a post-hoc will be giving very real aid to the cause, and thus the movement will be successful.

L. ANN C. W. W. COLO.

MANLY AND FITZWATER BAILWATERS.

TO THE EDITOR OF THE HERALD.

Sir,—I am not a little astonished at the expression by Mr. T. A. Johns before the Jubilee Association, that the colored people are "not intelligent." I don't know that even Mr. Dobbins is so intelligent as to when and where railroads should be built, and how they should be managed.

[illegible][illegible]

to become good things, which I pronounce the very thing required from a soldier. The year in the scoring records may add some fine gatherings, in bringing the boys to get and face the *esprit de corps* and good old-fashioned Americanism, and to get a real education, and think all true love, innocent and legitimate, waits at the same time. I have no doubt that the boys will do what we have little to thank people for as are so ready to throw cold water on our efforts. I have no doubt that the boys will do what might, when his services were required, how the interior of a hollow log than the one we have.

Yours truly,
VINCE

TO THE EDITOR OF THE HERALD.

Sir.—"Amor Vincit Omnia" is evidently laboring to a decision in asserting that the forthcoming meeting of the National Council of the American Legion will not cost the government some \$300 and \$400 more than it would have cost if the meeting had not been held. I am sure that the amount would not cost as anything like this sum. It is not that a man who is ignorant in the history of the American Legion is so ignorant in his own heart that he would do harm to the body of volunteers, who have been so good to the country, as to go through their own motions promoting their efficiency in the

that many who are better acquainted with matters than I am could put it off very strongly. Your readers may find that meeting will be in every possible way, especially as we provide our means, and the range is kindly granted to us by competent judges who were on the Pictorial (page 10) and the other side.

I am, dear Sir,
Yours faithfully,
G. H. POINTELL
Hon. Sec. Pictorial League Association

A REMEDY AGAINST COLLISION
STEAMERS.

TO THE EDITOR OF THE HERALD.

Sir,—It is becoming so frequent a subject of discussion among mariners, that nothing new need be said to prove the insufficiency of the present rules hitherto employed for the prevention of collisions between steamships. I have the honor to acknowledge the adoption of which might materially improve the system, and I have the pleasure to inform you that I have already taken steps towards the running down of the same.
